Rotaract Club of Xiamen University Malaysia

Rotary Club of Kuala Lumpur Dynamics

Rotary Club of Tun Razak Exchange

SDC Hackathon

Technical Tools Declaration

Hosted by Xiamen University Malaysia (XMUM) AI Club

Submission Deadline: 25 October 2026

Instructions: Declare every API, cloud service, AI tool, dataset, model, and sponsor resource your team used to build the project. Complete every section; where a category does not apply, tick "No" or write "None" – do not leave it blank. Submit as a single PDF document named "SDC2026_TeamName_TechDeclaration.pdf" together with your project submission. Undeclared third-party resources discovered at judging may affect your score or eligibility.

SDC HACKATHON 2026

Technical & Tools Declaration

Hosted by Xiamen University Malaysia (XMUM) AI Club
Submission Deadline: [Insert date]

Instructions: Declare every API, cloud service, AI tool, dataset, model, and sponsor resource your team used to build the project. Complete every section; where a category does not apply, tick "No" or write "None" – do not leave it blank. Submit as a single PDF document named "SDC2026_TeamName_TechDeclaration.pdf" together with your project submission. Undeclared third-party resources discovered at judging may affect your score or eligibility.

1. Team & Project Overview

Team Name	疯狂星期四
Project / Solution Name	**CareerNovacoke**
Name (Leader)	**LIN JIAXI**
Email & Phone (Leader)	breathfreea@outlook.com , **1123587027**
University Affiliation(s)	**Xiamen University Malaysia**
Live Prototype URL	https://careernova-coke.replit.app
Code Repository URL (public / access granted to judges)	https://github.com/breathfreea-ctrl/CareerNovacoke.git

2. Architecture & Technology Stack

2.1 System Architecture Overview

Describe how the components declared in this document connect end-to-end (e.g., user interface → backend → AI model/API → database → cloud hosting). Attach a system block diagram as an appendix if available.

[Maximum 200 words]

CareerNovacoke is a web-based career-guidance application built with HTML, CSS, JavaScript, Python, and Flask. Users interact with the frontend to complete a career-guidance questionnaire. The Flask backend handles questionnaire submissions and session management, then passes the answers to a Python-based matching module, which scores and ranks career options according to predefined matching rules.

The application retrieves career information from structured Python data defined in models.py, including career descriptions, salary ranges, target countries, qualifications, and learning resources. The backend returns the matching results to the frontend for display. Questionnaire responses are managed using Flask sessions rather than a confirmed external database.

The application is deployed on Replit, while GitHub is used for source-code hosting and version control. The current implementation uses predefined career data and rule-based matching.

2.2 Languages, Frameworks & Libraries

List the main programming languages, frameworks, and third-party libraries that your team did not create. Open-source use is permitted provided it is declared and properly licensed/attributed.

Name & Version	Purpose in Project	License
Python (3.12)	Backend programming language for questionnaire processing, career matching, scoring, and ranking.	PSF License
HTML5	Defines the structure of the website pages and questionnaire forms.	Web standard
CSS3	Styles the website layout, visual presentation, and responsive design.	Web standard
JavaScript (Vanilla)	Handles frontend interactions and client-side functionality.	No separate library license
Flask (3.1.3)	Backend web framework for handling routes, questionnaire submissions, sessions, and server-side logic.	BSD-3-Clause
Jinja2 (3.1.6)	Template engine for rendering dynamic HTML pages.	BSD-3-Clause
ChatGPT, OpenAI Codex, DeepSeek, Doubao, Tencent Yuanbao	AI-assisted coding, debugging, technical explanations, and documentation, where actually used.	Proprietary services; provider terms apply
Replit Core (Agent/IDE)	Online development environment used to build, edit, and assist with the web application.	Proprietary service
Replit Deployment	Hosts and deploys the CareerNova web application.	Proprietary service

GitHub	Hosts the source-code repository and supports version control.	Proprietary platform; repository license applies to project code

3. APIs & Cloud Services

3.1 External APIs

List every external API your solution calls (GenAI, maps, payments, messaging, data feeds, etc.). Do not include API keys or secrets in this document.

API & Provider	Purpose in Project	Access Tier (free / paid / sponsor-provided)

CareerNovacoke currently does not use any external APIs. The prototype uses its existing website functionality and does not directly call external API services.

3.2 Cloud Platforms & Deployment

List every cloud service used for hosting, storage, databases, authentication, or compute, and indicate how the prototype is deployed.

Service & Provider	Purpose in Project	Plan / Region
Replit Core	Hosting, cloud IDE, AI-assisted development, and deployment (published as public web app). No external DB (local storage).	Core Plan(Proprietary)/US
GitHub(Public Repo)	Code repository hosting, version control, and backup.	Free Plan/Global

4. AI Tools, Models & Datasets

4.1 AI Models Used in the Solution

List every AI model embedded in or called by your application, including pre-trained, fine-tuned, and self-trained models.

Model & Version	Source / Provider	Usage (pre-trained / fine-tuned / self-trained)	License / Terms
OpenAI Codex(Free Tier)	OpenAI	Pre-trained. Code writing, structural suggestions, adjustment advice, bug fixing.	Proprietary / ToS (Free Tier)
ChatGPT Free(GPT-4o mini)	OpenAI	Pre-trained. Optimizing overall app framework and refining ideas.	Proprietary / ToS (Free Tier)
Deepseek-V3	Deepseek	Pre-trained. Runtime/commit/integration ops, code merging, bug fixing.	Proprietary / ToS (Free Tier)
Tencent Yuanbao(Free)	Tencent	Pre-trained. Runtime/commit/integration ops, code merging, bug fixing.	Proprietary / ToS (Free Tier)

Doubao(Free Assistant)	ByteDance	Pre-trained. Search for information and sources, idea optimization.	Proprietary / ToS (Free Tier)
Gemini(Free Tier)	Google	Pre-trained. Translation assistance.	Proprietary / ToS (Free Tier)

All listed AI models were used only as free-tier development assistants (code review, debugging, ideation). No fine-tuning or self-training was performed, and no AI inference runs inside the deployed app.

4.2 Datasets

List all datasets used for training, fine-tuning, evaluation, or in the running application. State clearly if a dataset contains personal or sensitive data

Dataset Name	Source / URL	Type (public / private / self-collected / synthetic)	License	Personal Data? (Y/N)

	Commission of Malaysia (SPA); publication date not stated; verified **2026-10-22**. Official source for the education service role and grade information. https://spa.gov.my/syarat-permohonan/ijazah-sarjana-muda-sarjana-doktor-falsafah/pegawai-perkhidmatan-pendidikan-gred-dg9 **National Youth Council Singapore — "Teacher"**; institution: National Youth Council Singapore, Discover NYC careers platform; page marked **2026**. Notes that salary estimates draw on Singapore job portal information; it is not an official MOE salary scale. https://discover.nyc.gov.sg/toolkit/careers/teacher **Hong Kong Civil Service Bureau — "Master Pay Scale"**; institution: Hong Kong Civil Service Bureau; the pay scale page gives figures as at **2026-03-31** and a subsequent effective scale. https://www.csb.gov.hk/english/admin/pay/42.html **Hong Kong Education Bureau — "Salary ranges for teaching staff for the 2025/26 school year"**; institution: Hong Kong Education Bureau; school year: **2025/26**. https://applications.edb.gov.hk/circular/upload/EDBCM/EDBCM25061E.pdf **Jobs and Skills Australia — "Secondary School Teachers"**; institution: Jobs and Skills Australia; wage data source: ABS May 2025 earnings survey. Reports median weekly earnings for full-time teachers. https://www.jobsandskills.gov.au/data/occupation-and-industry-profiles/occupations/2414-secondary-school-teachers **National Careers Service — "Secondary school teacher"**; institution: UK National Careers Service; publication date not stated; verified **2026-10-22**. Provides UK salary guidance for starting and experienced teachers. https://nationalcareers.service.gov.uk/job-profiles/secondary-school-teacher **Government of Canada Job Bank — "Secondary School Teacher in Canada | Wages"**; institution: Employment and Social Development Canada, with data that includes Statistics Canada; wage reference period: **2023–2024**. https://www.jobbank.gc.ca/marketreport/wages-occupation/15904/ca			

4.3 AI-Assisted Development Tools

Tools used to help write code, design, content, or documentation (e.g., chat assistants, code completion tools, image generators). Declaring these tools does not reduce your score; undeclared use may.

Did your team use any generative-AI tool to help create code, design, text, or other project material?

☑ Yes ☐ No

If yes, list them below:

Tool & Version	**Used For**	**Extent of Use (minor / moderate / major)**
ChatGPT Free (GPT-4o mini)	Optimizing overall app framework and refining ideas.	**moderate**
Doubao(Free Assistant)	Search for information and sources	**minor**
GEMINI (Free Tier)	Translation	**minor**
DeepSeek-V4	Search for information and sources， write code	**moderate**
OpenAI Codex (Free Tier)	Code writing, structural suggestions, adjustment advice, and bug fixing	**moderate**
Tencent Yuanbao (Free)	Runtime/commit/integration ops, code merging, and bug fixing.	**moderate**

Briefly describe how your team reviewed, tested, and took responsibility for AI-generated output:

[Maximum 100 words]

We used AI tools (ChatGPT, Codex, DeepSeek, Yuanbao, Doubao, Gemini, Deepseek) as free-tier development assistants for ideation, code drafting, and translation. All AI-generated code was manually reviewed by our team for logic and accuracy, then tested through local runtime checks and debugging. The final merged code and deployed output were fully verified by us. We take full responsibility for all AI-assisted materials, with no undeclared use.

5. Sponsor-Provided Resources

Declare any official SDC sponsor-provided GenAI API, cloud credits, tools, mentoring, or data that your team used.

Did your project use any official SDC sponsor-provided resource?

☐ Yes ☑ No

If yes, list them below:

Sponsor	**Resource (API / credits / platform / data)**	**How It Was Used in the Project**

Was the sponsor resource essential to the core functionality of the prototype, or could it be replaced? Explain briefly:

[Maximum 100 words]

6. Security, Privacy & Responsible Use

6.1 Data Handling & Privacy

What user or personal data does your application collect, store, or send to third-party services (including AI APIs)? How is it protected, and how long is it kept? State "No user data is collected" if applicable.

[Maximum 150 words]

As a competition prototype, the application collects user-provided skills, interests, and educational background solely for local personalized career recommendation logic. No data is sent to external AI APIs (e.g., ChatGPT) or third-party services during runtime, consistent with our declared development-only AI assistance. Data is temporarily stored locally/session-based without long-term retention. No real user personal data is permanently collected or shared. We will implement formal privacy safeguards and retention policies before any production deployment.

6.2 Known Limitations & Risks

Identify the main technical limitations of your AI components (e.g., hallucination, bias, rate limits, dependency on a single provider) and any mitigation you have implemented.

[Maximum 150 words]

CareerNovacoke uses a deterministic, rules-based scoring system, not live generative AI. It matches self-reported skills, certifications, interests, salary, and location against ten curated roles. Thus, LLM hallucinations, API rate limits, and single-provider dependency are not current risks. Main limitations include a small manual dataset, fixed scoring weights, self-reported inputs, and potential biases in salary/location assumptions; recommendations may also become outdated. Results are guidance, not validated assessments. The app displays score breakdowns for transparency. Planned mitigations include expanding/reviewing role data, auditing weights across regions/groups, and refining via feedback. Future generative AI will be source-grounded, clearly labeled, with provider fallback and rate-limit handling.

7. Compliance & Readiness Checklist

Tick all boxes that apply before submitting.

- ☑ All APIs, cloud services, AI tools, models, and datasets used in the project are declared in this document.
- ☑ All third-party code, datasets, and models are used in accordance with their licenses, and attribution is provided where required.
- ☑ No API keys, passwords, or other credentials are exposed in the code repository, prototype, or this document.
- ☑ Any use of generative-AI tools for development has been disclosed and reviewed by the team.
- ☑ Any use of official SDC sponsor resources has been declared in Section 5.
- ☑ The prototype described here is accessible to judges through the links provided in Section 1.
- ☑ All fields in this template have been completed within the word limits stated.

8. Declaration

By submitting this document, the team leader confirms that the information provided is complete and accurate to the best of the team's knowledge, and that every API, cloud service, AI tool, dataset, model, and sponsor resource used in the project has been declared.
